

## Intelligence Studies Summit 2025

### Call For Papers

As the US Intelligence Community's university, the National Intelligence University (NIU) holds a unique position as the cornerstone of education, research, and innovation for developing and enriching the intelligence studies discipline now and into the future. NIU students are immersed in a classified learning environment that fosters the development of real-world solutions to national security challenges.

NIU will convene its first Intelligence Studies Summit (ISS) in Washington, DC during March 2025. The ISS aims to provide a collegial forum for academics and intelligence practitioners to share their research and discuss the intelligence studies discipline and intelligence education.

Please check the ISS website for updates and join our community! As Summit details are confirmed, they will be posted at [NI-U.edu/ISS](http://NI-U.edu/ISS).

We encourage submissions that align with the following three themes:

- I. Using technology to transform intelligence and intelligence studies.
- II. Reconsidering intelligence studies research and education, including perspectives on intelligence studies as an academic discipline.
- III. Defining the intelligence studies discipline to shape the future enterprise, in service to the Nation.

Paper proposals should be original research and intended for publication. Please submit your proposal on the Intelligence Studies Summit webpage at [www.NI-U.edu/ISS](http://www.NI-U.edu/ISS), on or before **Friday, December 6, 2024**.

Please indicate that you'd like to be considered for alternative forums, if you'd like to present your research but are unavailable in March 2025.

Please contact [NIU\\_ISS@niu.odni.gov](mailto:NIU_ISS@niu.odni.gov) with questions.

---

Note: We recognize that some papers will have multiple authors, please provide the contact information for the person who will be the primary point of contact for the paper.
